

## COMP 3350 Project Iteration 0

### Group 1(HealthTrack: The Applet for your Diet)

#### **Vision:**

**7/7**

- Vision summary
- Vision statement
- Does it conform with the interview?

Vision statement reflects the interview also the client asked for specific feature which is not included due to mentioned reason of development time limitation, you should ensure all client's requested features are included.

Aside from that, from software engineering point of view the idea is technically challenging enough I would say and looking forward for your upcoming iterations.

#### **Planning:**

**7/8**

- Big user stories for all iterations
- Detailed user stories for iteration 1
- Does it follow the preferences of the customer based on the interview?

Some of your detailed stories have huge cost, even bigger than the highest big user stories. You might as well break it down into more detailed stories. Please clearly specify the user stories belongs to which iteration and group the detail stories accordingly their respective big story (The cost allocated detailed stories can't exceed their big story's cost). Moreover, you are required to have 9 to 12 big stories.

#### **Total:**

**14/15**
